

Sex And Scent, Your Personal Pheromones

WHERE ARE MY PERSONAL PHEROMONES LOCATED?

In the Nose of whoever you come in contact with! At least they should be. There it is SEX and SCENT! In that Sexy Part of the Body called the NOSE!

Are you repelled by a person for no reason. It may be that their Pheromones just don't mix with yours. You not only smell the sexuality of another person, you sense a Pheromone Attraction coming from their Skin, Body and Mind.

No Kidding. We all have our very own Special SEXY Scent. You've heard me say this before... In case you forgot, here it is again... "We give off a special aroma from the day we are born and this is our very own essence, our personal pheromones. It is our own Custom Perfume Ingredient. During Sex this fragrance is highlighted! And that is truly the beginning of SEX AND SCENT."

When I first created NAUGHTY NIGHTS PARFUM, I was dripping in Female Pheromones. The Attraction was incredible. I get my share of "Hello, how are you?" But this was truly an interesting experience. Guys at the Gym, Cabbies, Executives on the Elevator and so on... They all had a very special smile on their faces. I had to move fast... I had forgotten the Female Pheromones. When I returned to my office, a few Lawyers in the Building wanted to linger and talk. What is going on? Lawyers never have time to talk! And when I'm at my office, neither do I. But when I entered the room I realized... ooooohh Lalala... it's those Female Pheromones.

And so NAUGHTY NIGHTS "Don't go to Bed Without it" TM c2003-2005 Alex Max New York LLC was created.

So it's more than true that some perfumes can actually start the process of sexual attraction. There are certain subtle fragrances if used in a proper combination that can make you attractive to the Opposite Sex or Even Your Own if you are so inclined.

Your scent when mixed with the right perfume ingredients can be dynamite in the bedroom and cause an incredible attraction wherever you go.

Why... Because Scent Really does log onto Memory. Remember your Mom's special Scent? It might have been a perfume or her style of cooking. When you remember does it bring a smile to your face. Well, when he or she remembers your special scent, guess what happens? I gave out samples of Naughty Nights Parfum to my friends, and the reports were incredible.
